

Innovated by us. Ridden by you.

Please COMPLETE this form on your pc (DO NOT PRINT AND HAND-WRITE), SAVE IT, make sure that all information is saved and RETURN IT to: YOUR LOCAL TOMCAT TRIKE DISTRIBUTOR or to info@tomcatuk.org

Your personalised quote for a TOMCAT TRIKE will then be sent to you. HOW TO FILL IN THE FORM :

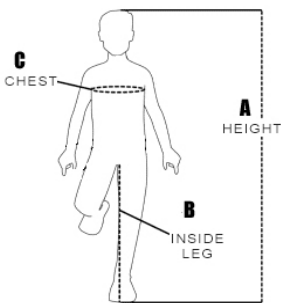

- 1) PLEASE COMPLETE ALL INFORMATION IN SECTION I "RIDER'S INFORMATION"
2) PLEASE CHOOSE THE APPROPRIATE ANSWER FROM THE MULTIPLE CHOICE QUESTIONS IN SECTION II "QUESTIONNAIRE" (BY CLICKING THE ARROW ON THE RIGHT OF THE FIELD, IF AVAILABLE)
3) IF POSSIBLE, PLEASE SEND US A VIDEO OR A PHOTOGRAPH OF THE RIDER SITTING, STANDING OR PLAYING

Fields IN RED* are mandatory

SECTION I - RIDER'S INFORMATION

RIDER'S NAME, SURNAME*
DIAGNOSIS*
GENDER* AGE*
MEDICAL CENTRE
PARENTS' NAME, SURNAME*
ADDRESS* POST CODE
CITY* COUNTRY*
EMAIL* PHONE
HEIGHT CM (A)* INSIDE LEG CM (B)* CHEST CM (C)

Please refer to the following chart. Measurements A) and B) must be taken whilst WEARING OUTDOOR SHOES

Note: For a person with a normal bone structure, the inside leg will generally equal half the height, less 2cm for a slim person or 5 cm when heavily built. For example, a slim person of 100cm, would have an inside leg of 48cm (100cm /2 = 50cm less 2cm = 48cm). Use this formula to cross-check your measurements! A book used as shown will help you achieve an accurate measurement, but try to get the longest inside leg possible. Measure them wearing outdoor shoes but without a nappy.

BUILD SHOE LENGTH CM*

SECTION II - QUESTIONNAIRE

1 - LEARNING DIFFICULTIES - the rider has:

relevant comments, if any, on Learning Difficulties

2 - DANGER AWARENESS -the rider has:

relevant comments, if any, on Danger Awareness

3 - MOBILITY - the rider has:

relevant comments, if any, on Mobility

4 - STANDING - the rider can:

relevant comments, if any, on Standing

5 - SITTING - the rider can:

relevant comments, if any, on Sitting

6 - HEAD CONTROL - the rider can:

relevant comments, if any, on Head Control

7 - EPILEPSY - the rider's seizures are:

relevant comments, if any, on Epilepsy

8 - NEUROLOGY - the rider's CP like condition is described as:

9 - The effect is:

10 - The limbs are affected in the following way:

relevant comments, if any, on Neurology

11 - RANGE OF MOVEMENT - the child has:

relevant comments, if any, on Range of Movement

12 - WHEN SITTING OR CYCLING - the rider's legs:

relevant comments, if any, on Sitting or Cycling

13 - LEG STRENGTH - when standing, sitting, or led on his/her back, the rider can:

relevant comments, if any, on Leg Strength

14 - TUMMY MUSCLES AND PELVIS - when excited, angry, distressed or uncooperative, the rider will sometimes:

15 - When pushing with his/her legs, for example when cycling, the rider will:

relevant comments, if any, on Tummy Muscles and Pelvis

PLEASE READ THESE IMPORTANT NOTES ON DRIVE TYPES, THEN ANSWER THE FOLLOWING QUESTIONS CAREFULLY

FIXED WHEEL: there is a direct connection between pedals and wheel - the wheels and pedals are locked together.

FREE WHEEL: the wheels can turn even when the pedals are not turning for example when coasting downhill, however, he/she will normally have to pedal to propel the trike.

MULTI SPEED: multi speed trikes are similar to free wheel trikes but have a range of speeds (5 or more gears).

The rider has a **PROVEN ABILITY* to:**

16 - Pedal a FIXED WHEEL trike

19 - Brake a trike or bike safely and quickly

17 - Pedal a single speed, FREE WHEEL, trike or bike

20 - Steer a trike or bike accurately, for example through a narrow gate or avoiding pedestrians

18 - Pedal a MULTI SPEED bike or trike

21 - Pedal a trike or bike without foot-support

*** VERY IMPORTANT:** Only answer "YES" if the rider has a **PROVEN** ability with the tasks 16 to 21. Otherwise answer **NO** or **I DON'T KNOW**. Do not enter what you would like them to be able to do, but only what you **KNOW** they can do.

22 - Preferred colour (please refer to the following chart colours):

22A - RED

22B - PINK

22C - BLUE

22D - LILLAC

Actual colours may differ slightly due to computer picture resolution and individual monitor settings.

23 - Do you often go cycling together with your family/ friends or would you like to if you could?

24 - Would you like your Tomcat trike to be convertible to a trailer to be towed by your bike?

Pic 1: the TOMCAT TRIKE

Pict 2: TOMCAT TRIKE as Pic 1 after conversion from trike to trailer (just 1 minute)

Thank you for your interest in the **Tomcat Trike**.

You will receive your estimate shortly.
